

Read me Final Assignment Data Processing.

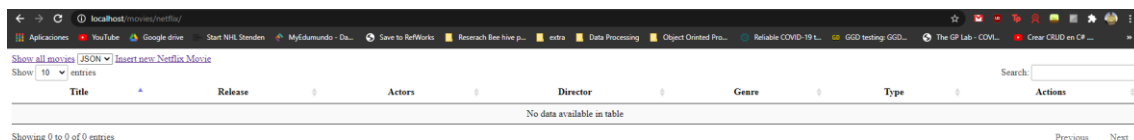

Introduction.

Hello and welcome Read me file for Data Processing of the student Jose Loperena Monzón (Pepe). In the document, I will explain step by step how to run the API application if needed. The documents to do this will be added in the folder.

Step by step how to make the visualization work.

1. Run the “movies” folder on a local server (Preferably XAAMP).
2. Start the API after starting the local server.
3. Use the application.

If everything was done correctly, something like this should appear:

This is an example of 1 of the 3 websites there is. Whenever the application is used and the different URL ´s are pressed differences can be seen such as:

Show all moviesJSONInsert new Netflix Movie

Show10entries

This is what It should look like for the 3 different pages if both the localhost and API are running correctly.

The 2nd screenshot will be shown when the “Show all movies” link is pressed.
